

"Young people vote ... Europe"

The students of the 2nd class of Lyceum for the EPAS program started - perhaps a little too soon - we will say - but we will continue our effort next year with other actions - their pre-election campaign, aiming at sensitizing young people but also their fellow citizens for their need to participate in the 2019 European elections.

With their slogan "Young people vote ... Europe", they inspired, designed and created the first series of elegant posters, with understandable, non political party color messages emphasizing the need for all of us to participate in the elections, to create the best Europe we dream, the best Europe we live in.

The posters decorate the reception area of the Panou Schools with the model of the European Parliament in Strasbourg and are also glued to the main entrance of the school, but also to other places in the city and schools of Nafpaktos.
